

WE SECURE THE FUTURE

SECURITY FOR SMALL BUSINESSES

SECURITY APPLIANCES FOR **SMALL BUSINESS**

UNCOMPROMISING PERFORMANCE

A common problem with firewalls used by small businesses has to do with hardware performance. Most often, vendor-stated bandwidth claims fall short when put to the real-world test. As a result, as Internet speeds degrade over time, security services are often disabled to compensate. This action allows entry for Internet attacks. Check Point security appliances for small businesses provide unparalleled security without the performance degradation witnessed by other firewalls. Small businesses are able to maintain full Internet performance without disabling key security features.

SECURITY WITHOUT COMPLEXITY

Many small businesses need protection against today's sophisticated cyber-attacks and zero-day threats. Check Point security appliances for small businesses bring the same protection used by large enterprises and Fortune 100 companies and make it easily accessible. The same next-generation firewall (NGFW) deployed to deliver the highest levels of protection for large enterprises integrates firewall, VPN, antivirus, anti-bot, application visibility and control, URL filtering, and email security in a simpler, easy-to-use, easy-to-manage small business package.

Ready to Use Pre-defined Security Policy

600 APPLIANCES

BIG SECURITY FOR SMALL OFFICES

600 APPLIANCE

600 APPLIANCE (WI-FI OPTION)

OVERVIEW

Growing both quickly and safely can be difficult for small businesses. As a small business you worry about survival and as you grow in size you worry about dozens of issues; from continuing to grow your market share to beating your competition to market. You want a secure network but how many people can you justify in your IT department? Security does not have to mean a large IT staff.

The Check Point 600 appliances deliver enterprise-grade security in a simple, affordable, all-in-one security solution to protect small business employees, networks and data from cyber-theft. This one device offers integrated, multi-layered security; Firewall, VPN, IPS, Antivirus, Anti-Bot, Application Visibility & Control, URL Filtering and Email Security — packaged into a quiet, compact desktop form factor. The 600 Appliance runs the same industry-leading security that is used to secure Fortune 100 companies.

ALL-INCLUSIVE SECURITY

All-Inclusive Next Generation Threat Prevention (NGTP): apply multiple layers of protection to prevent sophisticated cyber-threats — with Application Control, URL Filtering, IPS, Anti-Bot, Antivirus and Email Security.

600 APPLIANCE HIGHLIGHTS

A wide variety of network interface options are available including: 1GbE Ethernet ports, 802.11b/g/n WiFi, ADSL2, 3G and 4G wireless connections.

Maximum Capacities	620	640	680	
Firewall production throughput (Mbps) 1	20	50	100	
Threat prevention production throughput (Mbps) ¹	10	25	50	
1 GbE ports (Copper)	1x WAN, 1x DMZ, 8x LAN switch ports			
Wi-Fi option	802.11 b/g/n, MIMO 2 x 2			
DSL option	ADSL2/ADSL2+ (Annex A or B)			

¹ performance measured with an SMB HTTP real-world traffic blend, a typical rule-base, NAT, logging enabled and the most secure threat prevention

700 APPLIANCES

RELIABLE SECURITY, UNCOMPROMISING PERFORMANCE

OVERVIEW

Cyber criminals are getting smarter, leveraging highly sophisticated attacks, adapting their tactics to exploit any weakness and ultimately achieving their goals. These advanced techniques require an equally advanced security approach, one that incorporates a comprehensive set of capabilities to effectively prevent threats instead of merely detecting them. For small businesses this security should be predefined and ready within minutes of turning on the security appliance.

You can now protect your entire network from cyber threats with our award-winning Check Point Threat Prevention. For local management and support in a small office environment, an easy and intuitive web-based local management interface is available. If you don't have the time or expertise to manage your security, leverage our Cloud-Managed Security Services to remotely monitor, manage and apply firmware and security updates.

ALL-INCLUSIVE SECURITY

All-Inclusive Next Generation Threat Prevention (NGTP): apply multiple layers of protection to prevent sophisticated cyber-threats — with Application Control, URL Filtering, IPS, Anti-Bot, Antivirus and Email Security.

700 APPLIANCE HIGHLIGHTS

A wide variety of network interface options are available including 1GbE Ethernet ports, 802.11ac WiFi, VDSL2, 3G and 4G wireless connections.

Maximum Capacities	730	750	770	790		
Firewall throughput 1	900 Mbps	1.1 Gbps	1.6 Gbps	1.8 Gbps		
Threat prevention throughput ¹	100 Mbps	200 Mbps	270 Mbps	330 Mbps		
1 GbE ports (Copper)	1x WAN, 1x DMZ, 6	x LAN switch ports	1x WAN, 1x DMZ, 16x LAN switch ports			
Wi-Fi option	802.11 b/g/n/ac , MIMO 3 x 3		802.11 b/g/n AND 802.11 n/ac MIMO 3x3			
DSL option	VDSL ²		VDSL ²

1200R RUGGED APPLIANCES

SECURITY FOR HARSH ENVIRONMENTS

1200R APPLIANCE

OVERVIEW

Protecting critical infrastructures from cyberattacks poses unique challenges. The environments can be harsh and systems often use specialized protocols. Check Point's ICS/SCADA cyber security solutions provide advanced threat prevention paired with ruggedized appliance options and comprehensive SCADA protocol support to ensure vital assets such as power generation facilities, traffic control systems, water treatment systems and factories are never compromised.

The 1200R appliance complements our extensive appliance family to support a diverse range of deployment environments and meet specialized requirements. For instance, the 1200R complies with industrial specifications such as IEEE 1613, and IEC 61850-3 for heat, vibration and immunity to electromagnetic interference (EMI). In extreme temperatures from -40°C to 75°C where other appliances would fail, this appliance keeps you secure.

ALL-INCLUSIVE SECURITY

1200R APPLIANCE HIGHLIGHTS

Copper and fiber 1GbE Ethernet ports are included as is 3G and 4G wireless connection support through compatible USB modems.

Maximum Capacities	1200R			
Firewall production throughput (Mbps) 1	700			
IPS production throughput (Mbps) ¹	60			
WAN	1x 10/100/1000BaseT RJ45 or 1x 1000BaseF port			
DMZ	1x 10/100/1000BaseT RJ45 or 1x 1000BaseF port			
LAN	4x 10/100/1000BaseT RJ45 ports			
Mount Options	DIN rail or rack mount			
Industrial Certifications	IEEE 1613, IEC 61850-3			
Operating Environment	-40°C to 75°C			
Power	AC or DC			

¹ performance with a real-world traffic blend, a typical rule-base, NAT and logging enabled and the most secure threat prevention

CLOUD MANAGED SERVICE

Focus on your business. Leave the security to us.

- Advanced protection, maximum performance
- Unmatched flexibility
- Managed from the cloud
- Always-On 24x7 support

Monitoring

Reporting

Firmware Updates

Security Updates

LACK THE EXPERTISE OR TIME TO MANAGE YOUR SECURITY?

Check Point offers a cloud managed security service that will oversee the ongoing operation of the Small Business Appliances. Security experts from Check Point or a Managed Security Service Provider (MSSP) manage security at a very low monthly cost, allowing small business owners to focus on growing their business.

The Cloud-Managed Security Service offers a simple, all-in-one solution with easy setup.

- Ongoing management through the cloud by Check Point security experts
- Continuous automatic security updates and upgrades
- 24x7 customer support by Check Point's award-winning support team
- Security reports on demand or as requested

WHAT ARE YOU WAITING FOR?

Security for a small business is too important to ignore. With Check Point, small businesses can feel confident that they have the best security available, in a package that doesn't require extensive expertise or time to get high levels of protection.

Contact a Check Point Authorized Reseller today to get started with enterprise-level security that protects the small business.

Visit www.checkpoint.com/smb for more information.
